PROFESSIONAL SUMMARY

Highly skilled and safety-conscious Licensed Journeyman Electrician with 6 years of comprehensive experience in installing, troubleshooting, and maintaining complex commercial and residential electrical systems. Proven expertise in National Electrical Code (NEC) compliance, advanced diagnostic troubleshooting, blueprint interpretation, and smart home automation systems. Committed to rigorous safety standards while delivering precise, efficient, and reliable electrical infrastructure installations.

CORE COMPETENCIES

- Commercial & Residential Wiring
- Advanced System Troubleshooting
- Blueprint Reading & Circuit Design
- NEC Compliance & Safety Regulations
- Smart Home Automation Systems
- Project Management & Team Supervision

CERTIFICATIONS & LANGUAGES

- Licensed Journeyman Electrician
- OSHA 10-Hour Construction Safety Certification
- First Aid & CPR Certified
- English (Native Proficiency)
- Spanish (Conversational)

PROFESSIONAL EXPERIENCE

Lead Journeyman Electrician

2023 – Present

Apex Electrical Solutions

- Supervise a team of apprentices on high-budget commercial and industrial build-outs, tracking quality control and task schedules.
- Interpret multi-layered blueprint schematics to lay out conduits, panelboards, and complex electrical networks.
- Execute strict diagnostic tests on complex equipment malfunctions, minimizing operational downtime for industrial clients.
- Ensure absolute alignment with local building safety codes and national electrical standards, recording zero safety violations.

Electrician Specialist

2020 – 2023

Premier Residential & Commercial Electric

- Installed primary panel services, integrated smart home ecosystems, and executed comprehensive wiring upgrades for modern residential properties.
- Conducted targeted emergency troubleshooting and repairs on complex components including transformers, generators, and distribution switches.
- Maintained high-efficiency material allocations, reducing localized material waste margins by 10%.

EDUCATION

Associate of Applied Science in Electrical Technology

2020

State Institute of Technology
